SUMMARY

Senior Product Designer with 5 years of experience creating scalable, user-centered solutions across diverse sectors, including trade facilitation, data integration and automation platform, and recruitment platform. Skilled in design systems, accessibility, and collaborating with large enterprise teams to deliver consistent, high-impact digital experiences.

EXPERIENCE

Senior Product Designer - Skylabs AI | July 2025 - Present

- Led the UX strategy for a novel, formally verifiable coding agent, establishing a trust-centric interaction model that translated opaque AI verification logic into a transparent, developer-friendly interface.
- Architected the public toolkit leaderboard from 0-to-1, establishing a scalable data-visualization framework that enabled the developer community to benchmark complex agent scoring seamlessly.
- Overhauled the internal documentation UX, restructuring the information architecture and navigation to significantly streamline the developer research workflow.

Senior Product Designer - QLU.ai | Dec 2024 - Jun 2025

- Leading the creation of QLU's design system to establish a unified visual language, and reduce design debt through well-organized, reusable components.
- Streamlining the design process by building a scalable library of components and patterns, to enhance efficiency and reduce developer handoff time.
- Overseeing and managing two additional design systems, establishing processes for their scalability, maintenance, and systematic updates to ensure long-term consistency and growth.

Senior User Experience Designer - Astera Software | May 2023 - Dec 2024

- Designed Astera's Data Governance product that enabled users to monitor data and manage access, leading to significant improvement in data quality and compliance.
- Designed Astera's internal ERP, automating resource management tasks and streamlining processes, which reduced manual effort and improved operational efficiency.
- Improved collaboration between UX and developers by cataloging **100+ components** and integrating them with Storybook JS, reducing handoff time by **10%** and minimizing implementation errors.

UX Engineer - Pakistan Single Window (PSW) | Sep 2020 - Apr 2023

- Increased development efficiency by **25%** through the creation of a design system, enhancing reusability and ensuring visual and functional consistency.
 - Designed end-to-end goods declaration flow, including a seamless payment gateway, which improved trade-related task completion rates by **≈12%**.
 - Created seamless user experiences integrating systems and workflows of **70+** trade-regulating bodies, ensuring a unified and efficient digital platform.
-

EDUCATION

Bachelor in Computer Science (BSCS) - FAST - National University of Computer and Emerging Sciences (NUCES) | Aug 2016 — Jul 2020

SKILLS

User Interface Design, Responsive Experience Design, Visual Design and Strategy, Quantitative & Qualitative Research Methods, Collaborative Planning & Design, Usability Testing, Prototyping, HTML, CSS, SASS, Javascript, React JS, Bootstrap, Material UI, KendoUI, Tailwind CSS, Design Tools such as Figma, Photoshop, Illustrator, Premier Pro, After Effects
